SKILLS

HTML/CSS/SASS TailwindCSS CSS-In-JS JavaScript TypeScript React Redux/Redux Toolkit React Query Next.js Node.js Express.js
GraphQL(Apollo) REST Vite/Webpack/SWC Github Actions PostgreSQL(Prisma) MongoDB Storybook GCP(Cloud Run,Cloud Build,GCS,Pub/Sub)

EXPERIENCE

Hyresnap Frontend Engineer

May 2023 — Present

Bengaluru, Karnataka

Implemented an end-to-end payment system using Stripe to carry out recurring product subscriptions for international customers.
Designed a comprehensive transcription service tailored for proctored interview's reports with the help of a 3rd-party tool called Assembly AI.
Built a scalable image upload system from scratch using Next.js, Pillow, Flask and GCS, that allows users to upload their avatars using a cropper tool.
Integrated Razorpay payments for credit transactions for a user-centric mock interview service catering specifically to the Indian B2C tech market.
Integrated Single Sign-On (SSO) with Auth0, Firebase, and React for seamless Authorization experience for B2B Users.
Contributed to a number of major fixes, including removing memory leaks in the application and fixing anonymous authentication, which links multiple Auth providers, such as email and social authentication, using Firebase/auth.
Improved Core Web Vitals in mobile devices as well as reduced blog page initial load time by 30% by applying certain performance optimisations.
Wrote a script using NodeJs which migrates NoSQL data (Firestore) to SQL database(PostgreSQL).
Added Static Analysis Testing by implementing proper lint rules using tools like husky, Commitizen and Lintstaged.

Hoggy Software Engineer(Frontend)

May 2022 — November 2022

Bengaluru, Karnataka

Primarily worked on user-facing features, optimized them, and sent them to production.
Integrated business analytics tools such as MoEngage and MixPanel with Next.js to enhance user tracking.
Contributed to the Creator tool's gallery module to upload well-optimised media using Next.js, Redux, React-query.
Contributed in Hard-Typing the codebase, which resulted in a 50% reduction in runtime bugs..
Wrote unit test cases for Go APIs while migrating from Monolithic to Microservices infrastructure.
Wrote a CI script for vercel preview deployments prior to moving into production.

Codemancers Frontend Engineer Intern

November 2021 — December 2021

Remote, Kolkata

Improved code quality and contributed to an ongoing project by following TDD approach using React,Typescript, RTL & Jest
Contributed to the Open Vpn profile management of the organization using Hapi.js, Typescript & Prisma.

Strive Frontend Engineer Intern

November 2020 — January 2021

Remote, Kolkata

Contributed to the development of the platform's dashboard using Next.JS and Tailwind.
Used a wide-column No-SQL Database(AWS Dynamo DB) for carrying out CRUD operations

PROJECTS

Personal Projects

[Covlive](#) [2020] (React, SCSS, Context Api, Mapbox, Apex Charts)

Case tracking app providing accurate statistical data and rising cases using a 3rd party API's data and visualizing affected areas using Mapbox's maps.

[Deep Lip Reading](#) [2022] (React, TypeScript, Vite, Web Sockets, Python, Flask)

Built an end-to-end application that has options to capture pictures based on a timer or a single click to detect user lip movement to predict words.

[Upshot.app](#) [2022 - Present] (React, Redux, TypeScript, Node(Express), GraphQL, MongoDB(Prisma), Vite, Web Sockets)

Effortlessly Onboard, Promote and Sell your Products through automated posts, bidding etc done through Generative AI.

[Jobseek](#) [2022 - Present] (React, Redux, MongoDB(Prisma), Node(Express))

Developed a hassle-free platform for candidates as well as startups searching for the right one by adding an onboarding UI to filter out the amateurs.

PROJECTS

Open Source Contributions

[Next Auth](#) [2021] Fixed a bug for this OSS authentication library by correcting auth state of client-session api.

[Layer 5](#) [2021] Improved UX issue of a community website by adding delayed mount and unmount animation of the scroll to top button.

Mini Projects

[Debounced Google Search](#) [2022] (React, TypeScript) Debounced autocomplete functionality mimicking Google Search.

[Typeform Prototype](#) [2023] (NextJs, TypeScript, Docker) Typeform forms like scroll functionality

Blogs

[Domain name and hit Enter. Then?](#) [2023] De-mystifying the science behind humankind's greatest invention.

EDUCATION

B.Tech Information Technology

July 2018 — 2022 Netaji Subhash Engineering College (**NSEC**) **8.5** (CGPA)
